ACCELERATED DEPLOYMENT FOR MACHINE LEARNING PLATFORMS

FPGA parallelization can accelerate neural network computations for machine learning platforms and help companies build next-gen autonomous machines.

The problem is, FPGA development with neural networks is extremely complex.

But that doesn't have to slow you down.

FRUSTRATION-FREE MACHINE LEARNING

Shorten your time to market and leave your competition behind with FPGA and Machine Learning engineering services from DornerWorks.

Schedule a meeting with us today and arrange a demonstration or discuss your product goals with our ML engineers.

DEVELOPMENT & ACCELERATION

- VHDL
- Verilog/SystemVerilog
- C/C++
- HLS
- Xilinx SDRSoC
- DNNKD
- Matlab
- Simulink

VERSATILE PLATFORM EXPERTISE

- Xilinx
 - Vitis
 - Versal
 - MPSoC/RFSOC
 - Kria SOM

NICHE PRODUCTS LEAD YOUR MARKET

- High speed applications
- Low power requirements
- Model simulation/Prototyping

DornerWorks.com | +1.616.245.8369

DornerWorks is a
professional, flexible,

**AND AN ESSENTIAL PART
OF OUR TEAM**

**TURN MACHINE LEARNING IDEAS
INTO REAL-LIFE PRODUCTS**

- Custom platforms that enable you to deploy ML algorithms using Xilinx Vitis.
- Xilinx Machine Learning IP deployed on your platform.
- Support for Xilinx Vitis tools to guide your Machine Learning development.

XILINX
Premier Partner

GET STARTED TODAY

Connect with us now. Together we will map out a plan that meets your product goals and helps you lead the market.
