

COST-EFFECTIVE CUSTOMIZATION WITH YOCTO PROJECT

Highly specialized hardware and software configurations shouldn't be held back by costly or inefficient multi-OS systems. An operating system ought to enable you to operate your system efficiently and without draining your development budget.

An open source Linux deployment using Yocto makes all of this possible.

REDUCED SIZE & SCALE

Yocto Project allows you to fit your operating system to your specific hardware target, without unnecessary components.

FLEXIBLE & REUSABLE

Linux deployments can be ported across devices, saving you valuable development hours.

FREEDOM FROM VENDOR LOCK

Yocto Project and Linux are open source Linux distros, so you won't ever have to pay licensing costs.

SUPPLIER QUALIFIED

yocto PROJECT

CUSTOMIZATION WITH THE FUTURE IN MIND

A customized Linux build can run on multiple processor architectures in your system, and because it is open source, you'll never be held back by vendor lock.

It is possible to build a custom OS that supports your full technology stack, and DornerWorks can help you build it.

“DornerWorks is a professional, flexible,
**AND AN ESSENTIAL PART
OF OUR TEAM**”

BOARD SUPPORT PACKAGES (BSP)

A Linux operating system that's perfectly fit to your target hardware.

LONG-TERM SUSTAINMENT

Confidence that your OS will be kept up to date with the latest features and capabilities.

OVER-THE-AIR PLATFORMS

Remove the complexity of systems updates with an OTA solution.

CLARITY & CONFIDENCE FOR COMPLEX DEVELOPMENT

Linux operating systems are open source and free for you to download and use. but the fastest and easiest way to bring the benefits of customized Linux to your project is with Yocto Engineering Services from DornerWorks.

Whether you're reliant on the latest Xilinx MPSoC, ARMv7, ARMv8, PowerPC, or NXP silicon, DornerWorks can help you find the custom solution that's right for your system.

INDUSTRIAL CONTROL

DornerWorks guided Dexter Laundry to a system built with Yocto for their IoT-connected industrial machines.

With the flexibility and control this system has brought the company, Dexter has been able to easily scale it across product lines.
