

Imagine thousands of connected devices in the field, all carrying your "secret sauce."

How do you securely and reliably update their software?

OVER-THE-AIR SOFTWARE UPDATES

 from DornerWorks

CLOUD-BASED
MANAGEMENT
& EMBEDDED
IMPLEMENTATION

**GIVE YOU
PEACE OF MIND**

The Over-The-Air update system from DornerWorks keeps your system optimized behind the scenes, leaving you free to focus on growing your business.

SECURITY MEASURES ROBUST ENCRYPTION

- Thwart malicious hackers
- Encrypted updates fight reverse engineering
- Prevent unauthorized firmware updates
- Manage device authentication

DATA COLLECTION & STATISTICS

- Leverage data from all of your devices
- Own your data – export or integrate via our Open API and use it as you see fit
- Understand your users' habits
- Reveal insight into potential issues before they become widespread

FAULT TOLERANT UPDATE PROCESS

- Functional redundancy prevents irreversible failure
- Update management ensures HW/SW compatibility
- Prevent software update roll back attacks which can re-introduce vulnerabilities

DornerWorks.com | +1.616.245.8369

The members of your team are

CONSISTENTLY HIGHLY REGARDED

That is why we do not hesitate to send difficult technical tasks to your team.

*I am not sure what you guys are doing to attract the top talent,
but we sure like the results.*

DORNERWORKS OTA ENABLES PROCESS FLEXIBILITY

- Choose what you want to update, from single files and apps to entire firmware images
- Update edge devices through any interface: USB, ethernet, WiFi, Bluetooth, etc.
- Design multi-step update process
- Slow roll out your updates to groups of devices

FRUSTRATION-FREE CUSTOM IMPLEMENTATION

We can use a SaaS cloud-based solution or license the software and host it on your premises, as well as:

Customize the approach for your embedded devices using available software packages.

Monitor third party software for security and performance releases for your platform.

Use open API to integrate your enterprise systems or third-party service providers.

OTA updates can optimize your FreeRTOS platform, Linux application and kernel, multi-processor platforms, and more.

Start now! Set up **OTA Software Updates** on your devices today,
leave your worries behind and *get back to growing your business!*
